Newly Reported Substances: The following substances were reported to NFLIS-Drug for the first time between April 1, 2022, and June 30, 2022.

Snapshot of Drug Reports Received by NFLIS-Drug

The tables on the right present the top five drug reports in each category received by NFLIS-Drug between April 1, 2022, and June 30, 2022.

Upward Trends, by Date Submitted to Laboratory

Note: A reliable percentage for June could not be calculated because of the small proportion of expected total reports received by NFLIS at the time of analysis.

Data Disclaimer: Substances identified by Federal, State, and local laboratories are included in the raw counts of drug reports received by NFLIS-Drug. Raw counts have not undergone any adjustments to account for laboratory nonresponse. Data for this publication were exported from the NFLIS-Drug database in July 2022. Data in the Newly Reported Substances and Snapshot of Drug Reports Received by NFLIS-Drug sections include only drugs submitted to laboratories on or after April 1, 2021. Because of the time it takes for a laboratory to analyze seized material and transfer the data to the NFLIS database, the data in this publication—unlike those reported in an Annual or Midyear Report—are not comprehensive and do not reflect total counts of drugs analyzed over the period. More information on NFLIS data limitations can be found in the NFLIS Questions and Answers guide: https://www.nflis.deadiversion.usdoj.gov/nflisdata/docs/2k17NFLISQA.pdf. NFLIS reports are available at https://www.nflis.deadiversion.usdoj.gov/publicationsRedesign.xhtml. Questions and comments: NFLIS@dea.gov
